Engage More Volunteers and Build New Efficiencies

Engage more volunteers with VolunteerHub. Our integration with leading CRMs bridges the gap between your volunteer and donor databases. In addition, innovations such as our virtual kiosk, mobile compatibility, intelligent deduplication, and custom-branded entry pages will help your organization build new efficiencies.

Since 1996, VolunteerHub has been used by nonprofits to track over 5 billion hours (yes, billion with a “b”). We’ve established a strong record of helping nonprofits engage more volunteers through technology. Our software offers enterprise-grade functionality at an affordable price. In addition to offering seamless integration with leading CRM systems, VolunteerHub’s mobile compatibility and virtual kiosk feature make it the perfect choice for the event-focused organization.

Powerful, yet intuitive:

» CRM Integration makes VolunteerHub the most powerful volunteer system on the market. Instantly connect volunteer and donor information, providing your organization with greater efficiency and insight.

» OnSite “Virtual Kiosk” turns your iPad or other mobile device into a flexible check-in machine. You can even let volunteers self check-in with their own devices.

» Intelligent Deduplication takes the guesswork out of removing overlapping records. Simply point and click, and VolunteerHub does the thinking for you.

“VolunteerHub isn’t just for volunteers. It’s a useful tool for any organization needing to coordinate many individuals and groups involved in many events.”

—Janet S.
Feature Overview

Integration with the Leading CRMs
VolunteerHub’s CRM integration automatically replicates volunteer data into your CRM, converting your volunteers into constituents and volunteer hours into journal entries. Synchronization occurs in the background, updating your CRM database with existing and new volunteers, their contact information, and history. VolunteerHub automatically prompts volunteers to update their contact information monthly, to keep your CRM database as accurate as possible.

Beautiful on Tablets & Mobile Devices
Take VolunteerHub with you wherever you are connected to the Internet. Simply launch VolunteerHub in your device’s browser, and the application dynamically resizes for your screen’s resolution. The mobile layout offers a simplified navigation that is more conducive to mobile usage.

Let Volunteers Self Check-in with Virtual Kiosk
Traditional kiosks tend to be expensive and are rarely helpful for outdoor events with multiple registration stations. Our “virtual kiosk” is a game-changer. The virtual kiosk is quite flexible and accommodates a wide variety of check-in scenarios. Simply mount an iPad or other tablet device to a wall or desktop, and volunteers can begin checking themselves into your events. It’s that simple.

Save Time with Intelligent Deduplication
VolunteerHub’s “intelligent deduplication” ensures the accuracy of your volunteer database while reducing burdens on your administrative staff. Our proprietary algorithm does the thinking for you, delivering cleaner records, fewer errors, and no guesswork. This automated approach saves your team hours of frustration. Spend that extra time engaging – instead of dedup-ing.

Create Event-Specific Entry Pages
Not every volunteer initiative is identical. Your organization may have special or seasonal events that need customized branding and messaging. With VolunteerHub, you can easily create custom-branded landing pages to support specific events, attract more corporate sponsors, or support multi-chapter/multi-location initiatives.

Try VolunteerHub Risk-Free!
During the 30 day trial period, you’ll have full access to the entire VolunteerHub platform, without any contracts or purchase agreements. We are confident that you will love our system!
